Full Professional Proficiency

Japanese

Elementary Proficiency

INTERESTS

Basketball

Football

Travelling

Gaming

Music Production

EDUCATION

Bachelor's of Science in Computer Science

University of the People

07/2022 - 01/2025

Pasadena CA, USA

Courses

▣ Databases

▣ Python

▣ Information Retrieval

▣ Statistics

▣ Data Mining and Machine Learning

▣ Data Structures

WORK EXPERIENCE

Remote Data Analyst (Volunteer)

Guardian's Embrace

05/2025 - Present

San Diego, USA

Non-profit Organization

Achievements/Tasks

- ▣ Designed and built the non-profit's first end-to-end financial data reporting system, creating interactive Power BI dashboards to provide leadership with real-time visibility into donations, expenses, and investment flows.
- ▣ Engineered and managed the complete automated data pipeline, integrating Zeffy (donations) and Relay Bank (expenses via Plaid API) with Google Sheets using Zapier and Pipedream. This has eliminated 100% of manual data entry and ensures data integrity.
- ▣ Architected a secure, multi-file data warehouse in Google Sheets, separating sensitive donor and financial data into distinct files. Created a unified master reporting ledger using advanced formulas (QUERY, IMPORTRANGE, LET) to provide role-based, "need-to-know" access for stakeholders.
- ▣ Took on IT administration responsibilities to support the data infrastructure, including setting up and managing the organisation's Google Workspace. Established a central IT service account to own all data assets, created user accounts, and enforced security best practices like MFA.
- ▣ Utilised ClickUp for end-to-end project management, creating detailed process flowcharts, managing the system migration timeline, and documenting the new data architecture.
