

TONGAI ZINAKA

Data & Business Intelligence Analyst | BI Pipeline Automation | Financial Reporting
tongaizinaka@gmail.com • +263 772 207 711 • Chiredzi, Zimbabwe • tongaizinaka.co.zw • linkedin.com/in/tongai-zinaka

SUMMARY

Data & BI Analyst with a BSc in Computer Science and Microsoft PL-300 certification. Specialises in end-to-end data pipeline design, warehouse architecture, and executive financial reporting. Built a non-profit's complete data infrastructure from scratch — three automated API pipelines, a Google Sheets data warehouse, and a Power BI reporting suite. Founder of Zinaka Analytics, delivering BI consulting and tools to SMEs in Zimbabwe.

WORK EXPERIENCE

Data Analyst & Systems Architect

May 2025 – Present

Guardian's Embrace — Non-Profit | Remote, San Diego USA | Volunteer

Pipeline, Data Warehouse & Modelling

- Designed and deployed 3 automated data pipelines from zero: donor transactions (Zeffy) via Zapier, bank transactions (Relay Bank) via Pipedream + Plaid API, and investment/market data (Interactive Brokers) via Make.com + Flex Query — eliminating 100% of manual data entry.
- Designed a secure multi-file Google Sheets data warehouse with role-based access for 5–8 team members; unified master reporting ledger powered by QUERY, IMPORTRANGE, and LET formulas.
- Cleaned, modelled, and structured all financial datasets end-to-end — donor, banking, and investment data — from raw multi-source ingestion through to report-ready data models with reliable segmentation.

Reporting & Dashboards

- Delivered 15 monthly expense reports and 15 monthly executive reports (a total of 30 from February 2025 until present) combining banking and investment data to present net financial position and cumulative income since inception.
- Leading development of 5 interactive Power BI dashboards (donations, expenses, investment performance) giving executives real-time financial visibility for the first time.

Leadership & Administration

- Sole Google Workspace administrator: user provisioning, access control, MFA enforcement, and data sharing across all volunteers. Serve on the on-boarding team; coordinate cross-functional collaboration and manage delivery via ClickUp.

Founder & BI Consultant

Jan 2024 – Present

Zinaka Analytics | Chiredzi, Zimbabwe

- Deliver Power BI dashboard development, data pipeline design, and analytics consulting to Smallholder farmers and various SMEs.
- Built and maintain a free financial ledger Progressive Web App (tongaizinaka.co.zw); two-stage engagement model — Progressive Web App on-boarding to generate structured data, then Power BI delivery once a data baseline exists.

SKILLS

BI & Visualisation: Power BI, DAX, Power Query, Data Modelling, Dashboard Design, Financial Reporting

Data Engineering: ETL Pipelines, API Integration, Zapier, Pipedream, Make.com, Plaid API, Google Sheets, Data Warehouse Design

Languages & Tools: SQL, Python, Microsoft Excel, Google Workspace Administration

Soft Skills: Stakeholder Reporting, Cross-team Coordination, IT Administration, Project Management (ClickUp)

EDUCATION

BSc Computer Science

Jul 2022 – Jan 2025

University of the People | Pasadena, CA, USA (Remote)

Databases · Statistics · Python · Data Mining & Machine Learning · Data Structures · Information Retrieval

CERTIFICATIONS

Microsoft Certified: Power BI Data Analyst Associate (PL-300)

Nov 2022 – Present

Network and Application Security

Jun 2024

International Computer Driving Licence (ICDL)

Jun 2013
